## About Me

As a passionate and versatile designer, I have over 5 years of experience in developing web, mobile, and data science solutions, specializing in back-end, intuitive user interfaces, and embedded systems. Thanks to my 3 years of electrical engineering and my cross-functional skills, I design robust, reliable technological ecosystems that are tailored to real-world challenges.

I am also the founder of initiatives such as INTERACT, a visionary project aimed at supporting African entrepreneurs and businesses in their transition to digitalization, data security, and technological empowerment. My approach is impact-driven: transforming ambitious ideas into concrete, sustainable, and innovative solutions.
